Job Title: Senior Security Technology Analyst  
Job ID: 23128

Location: Port Authority Technical Cntr  
Full/Part Time: Full-Time

Regular/Temporary: Regular  
Favorite Job: Star

About The Port Authority

Founded in 1921, the Port Authority of New York and New Jersey builds, operates, and maintains many of the most important transportation and trade infrastructure assets in the country. The agency’s network of aviation, ground, rail, and seaport facilities is among the busiest in the country, supports more than 550,000 regional jobs, and generates more than $23 billion in annual wages and $80 billion in annual economic activity. The Port Authority also owns and manages the 16-acre World Trade Center site, where the 1,776-foot-tall One World Trade Center is now the tallest skyscraper in the Western Hemisphere.

Responsibilities

Reporting to the Manager, Security Technology & Communications, the Senior Security Technology Analyst will track, manage, and report on security technology effectiveness Agency wide. This position will aid in the review and implementation of all new and updated security technology standards, procedures, materials, and operations. The Analyst will be a resource for all department inquiries regarding security technologies and provide education and awareness programs to ensure Agency support. Reporting and tracking Agency progress towards adoption of new technology and standards will be a crucial responsibility as well as providing baseline testing and metrics for current security technology performance.

Responsibilities include, but are not limited to:

- Review Concept of Operations, Standard Operating Procedures, Security Manuals and all other plans related to security technology systems for effectiveness and make recommendations for overall compliance with policies and standards.
- Implement and review security technology standards with a focus on the operational success of electronic security systems, which includes but is not limited to CCTV, Access Control, License Plate Recognition, and Perimeter Intrusion Detection.
- Assist Agency staff and personnel in developing user requirements and in the adoption and implementation of all new and updated security technologies and procedures.
- Analyze and track performance of current security technology operations and provide baseline testing and approval of proposed new security technologies.
- Create and deliver education and awareness programs, as necessary, to aid with implementation of security technology standards and policies.

Qualifications

Candidates must present the following qualifications to be considered eligible for this position:

- Bachelor's Degree in Criminal Justice, Security, Engineering, Business Administration, Technology or related field from an accredited college or university.
- A minimum of five (5) years of progressively responsible management experience including supervisory experience in the technology field.
- Must have a valid drivers license.

Desired

Ideal candidates will present the following profile:

- Familiarity with intelligence and security technologies, hardware, and software
- Superior interpersonal skills to interact with staff at all levels, supporting departments, consultants and outside agencies.
- Demonstrated knowledge of Port Authority management process and procedures.
- Proven ability to identify problems, assess the accuracy and relevance of information, use sound judgment to generate and evaluate alternatives, develop consensus, and make recommendations.
- Demonstrated ability developing successful strategies to achieve broad program and business goals and understanding the impacts on various key stakeholders both within and outside the Port Authority as well as how they interact.
- Extensive experience and knowledge of the principles, methods, and tools for developing, scheduling, coordinating, and managing initiatives and resources.

Compensation & Benefits

The Port Authority of New York and New Jersey offers a competitive salary, an outstanding benefits package and a professional environment that supports development and recognizes achievement.

About The Port Authority

Founded in 1921, the Port Authority of New York and New Jersey builds, operates, and maintains many of the most important transportation and trade infrastructure assets in the country. The agency’s network of aviation, ground, rail, and seaport facilities is among the busiest in the country, supports more than 550,000 regional jobs, and generates more than $23 billion in annual wages and $80 billion in annual economic activity. The Port Authority also owns and manages the 16-acre World Trade Center site, where the 1,776-foot-tall One World Trade Center is now the tallest skyscraper in the Western Hemisphere.

Responsibilities

Reporting directly to the General Manager, Tunnels, Bridges, & Terminals Security, the Security Administrator will be the primary point of contact for all matters related to security operations and security projects at his/her assigned facilities. This includes the operational management of all security related personnel, systems, and information. Responsibilities include but are not limited to: Supervise facility security operations for all civilian facility security functions at the assigned facility(ies). Recommend, implement, monitor, and improve physical security and security technology solutions at the facility(ies). Perform routine security post spot checks and security vulnerability assessments. Manage all security guard scheduling and contract management for the facility(ies). Improve civilian security operations by standardizing orders, proper procedures, and capturing performance metrics. Manage all information security functions as the SIM for the assigned facility(ies). Liaison with the Port Authority Police Department and Facility Operations staff on security matters to ensure effective response and coordination on security responses and incidents.

Qualifications

Candidates must present the following qualifications to be considered eligible for this position: A minimum of five (5) years of progressively responsible security experience including supervisory experience in the security operations field.

Desired

Ideal candidates will present the following profile: Bachelor's Degree in Criminal Justice, Security, Business Administration or related field from an accredited college or university. Hands-on experience recommending and implementing physical and security technology solutions. Expert knowledge of the principles, methods, and tools for developing, scheduling, coordinating, and managing initiatives and resources. Experience supervising security operations for a facility or company. Expert knowledge of the principles, methods, and tools for developing, scheduling, coordinating, and managing initiatives and resources. Understanding of security assessment methodologies and experience performing threat and vulnerability assessments. Demonstrated experience with security technology system administration. Superior interpersonal skills to interact with staff at all levels, supporting departments, consultants and outside agencies. Demonstrated negotiation and conflict resolution skills. Proven ability to identify problems, assess the accuracy and relevance of information, use sound judgment to generate and evaluate alternatives, develop consensus, and make recommendations.

Compensation & Benefits

The Port Authority of New York and New Jersey offers a competitive salary, an outstanding benefits package and a professional environment that supports development and recognizes achievement.

Interested candidates should apply to this job by clicking on the Apply Now button and submitting a combined cover letter and resume. Only applicants under consideration will be contacted.

EQUAL OPPORTUNITY EMPLOYER

The Port Authority of New York & New Jersey/Port Authority Trans-Hudson (PATH) is an Equal Opportunity Employer.
About The Port Authority

The Port Authority Trans Hudson Corporation (PATH), an FRA-regulated commuter railroad, is the primary transit link between Manhattan and New Jersey communities and suburban commuter railroads. Carrying over 75 million passengers per year, PATH trains run 24 hours a day, seven days a week, one of the few 24-hour systems in the world. Since the early 20th Century, PATH and its predecessor, the Hudson & Manhattan Railroad, have carried passengers between New Jersey and points in Midtown and Lower Manhattan, serving as a key link in the regions transportation network and as a catalyst for continued residential, commercial and employment growth.

Responsibilities

Under direction of the Principal Engineer Signals, the incumbent is responsible for test, modification, maintenance and trouble response on operating digital systems for vital and non-vital train control applications. The networked equipment is spread geographically over the entire PATH system, and includes locations above ground and below, and locations accessible only from active trackways. Field work includes directing a unionized workforce, as required to support these efforts.

The incumbent is also responsible for the preparation or review of design documents, test documents, procedures, contract documents, planning documents, and as-built drawings etc. to ensure compliance with standards and good practice.

Qualifications

Candidates must present the following qualifications to be considered eligible for this position:

- Must possess a Bachelors degree in Electrical or Electronics Engineering, or related discipline, from a recognized college or university.
- Minimum 5 years recent full-time paid work experience in the data communications field, with a concentration in and direct responsibility for designing, configuring, integrating, installing, testing, and operating computer networks, including fiber, copper, and/or radio links.

Desired

Ideal candidates will present the following profile:

- General familiarity with rail transit systems and operations.
- Configuration and network IP Address management
- Network Security Administration
- Data protocols
- The incumbent will periodically be required to work in severe weather conditions, work in tunnels adjacent to active electrified tracks, work in cramped, slippery, dusty locations, and work on all shifts and with a non-traditional workweek.

Compensation & Benefits

The Port Authority of New York and New Jersey offers a competitive salary, an outstanding benefits package and a professional environment that supports development and recognizes achievement.

How To Apply

Interested candidates should apply to this job by clicking on the Apply Now button and submitting a combined cover letter and resume.

Only applicants under consideration will be contacted.
